Art Unit: 1771

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 14-61 are rejected under 35 U.S.C. 103(a) as being unpatentable over Albert '669, substantially for reasons of record as set forth in Paragraph No. 5 of Paper No. 111705, together with the following additional observations. More particularly, the Examiner adheres to his position of record, while with respect to applicant's traversal (Response, page 11) which appears to be based totally upon the fact that the reference is not available as prior art since it is in the chain of priority, the Examiner must respectfully again disagree. The fact that the reference is in the chain of priority does not eliminate it as a reference since there is no disclosure in Albert '669 of the apparent point of novelty, i.e. the presence of an adhesive layer located on the opposite side of the disclosed grip enhancing material from the plurality of the attached suction cups of the invention as claimed in all of the claims. As such the **prima facie** case of record appears not to have been rebutted.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to

Art Unit: 1771

be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 14-61 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,675,392, claims 1-12 of U.S. Patent No. 6,427,248 and claims 1-7 of U.S. Patent No. 6,055,669. Although the conflicting claims are not identical, they are not patentably distinct from each other because each of the patented claims lack the presence of "an adhesive", i.e. an adhesive layer on the opposing side of the grip enhancing material suitable for adhering the material to the "first object " such as a glove, but the Examiner believes that to use an adhesive layer as an attachment means for attaching the grip enhancing material or glove of each of the claims of these three patents is so well known as to take Official Notice thereof. With regards to the dependent claims these also involve such well known elements or different types of known adhesives so as to be, if not either expressly or inherently disclosed, then they are an obvious modification to one of ordinary skill, in the absence of unexpected results.

5. Claims 14-61 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-34 of copending Application No. 10/384,003. Although the conflicting claims are not identical, they are not patentably distinct from each other because the same rationale that was presented above with respect to the claims of the three patented applications is again believed to be particularly applicable.

Art Unit: 1771

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

6. The suggested Drawing changes in Figures 21 and 22 are approved.
